Permitted Mooring Details

Details and position of mooring: .....

Detail tackle to be used: .....
(e.g. Anchor/clump & cable size – sketch on reverse of form)

Insurance

All applications must be accompanied by evidence that the applicant holds valid insurance cover, including:

Third party liability insurance with a minimum cover of £2,000,000 per claim (each and every occurrence); and Boat insurance (including hull and machinery, salvage, and wreck removal) where applicable.

The policy must be placed with an insurer authorised to operate in the United Kingdom, and the interest of the Port Authority must be noted on the third-party liability policy.

Mooring Arrangement

All applications must be accompanied by full details of the proposed mooring arrangement. This must include a plan or diagram showing the layout, positioning, and components of the mooring, together with specifications of all equipment to be used (including chains, anchors, risers, buoys, and ground tackle).

The submitted arrangement must be suitable for the location, vessel type, and expected environmental conditions.

Insurer confirmation of Mooring Arrangement

All applications must be accompanied by written confirmation from the applicant's insurer that the proposed mooring arrangement is acceptable for insurance purposes.

This confirmation must clearly state that the insurer is satisfied with the design and specification of the mooring and that it is covered under the applicant's policy.

Mooring Maintenance Plan

All applications must be accompanied by a maintenance plan for the proposed mooring. This must include inspection and maintenance intervals for the mooring arrangement to be followed, including the frequency, the scope of checks to be undertaken, and replacement of components.

The Permitted Mooring shall be kept and maintained in good, safe and substantial repair and condition
