DISCOVER INVERGORDON

Imagine stepping ashore where Vikings once sheltered, in a Firth whose early name - "Siccar Sound" - means "safe haven". This tranquil inlet hides a fascinating past, having been the Royal Navy's secret anchor for the mighty Grand Fleet in the First World War.

Stroll along Invergordon's waterfront and learn how its sailors shook the British government in the famed 1931 Mutiny over pay cuts, and about the colossal Inchindown oil tanks still echoing with stories of covert fuel storage.

Today, visitors can admire gleaming cruise ships berthed amidst towering oil rigs which are repaired and maintained in the Port, alongside state-of-the-art wind-turbine components being used to construct the UK's net-zero energy future. Invergordon is where Scotland's seafaring past and its cutting-edge renewable future combine in one unforgettable coastal tapestry.

**THANK YOU FOR VISITING
AND HASTE YE BACK!**
